

## SCHOOLS AND TREES

Continued from page 5  
up only on cloudy, damp days. As they are lifted from the soil they should be laid in piles, roots together, and the roots immediately covered with a few shovelfuls of moist earth until they can be wrapped in wet burlap or coarse cloth of some sort. If they are to be sent any distance the roots of the trees should be carefully packed in damp moss or chaff, and the whole securely wrapped with the burlap.

### Cultivation of the Nursery Bed.

The trees transplanted to the nursery beds should be cultivated frequently, but not by deep plowing or spading, which would injure the roots. The weeds must be kept down and the ground kept loosened to a depth of 2 to 3 inches. The care of the nursery stock is in every way similar to that of the seedlings in the seed bed.

### Planting of School Grounds.

The final disposal of the trees grown in the school nursery is a matter of much importance. The success of the whole undertaking will depend largely upon how many strong, desirable trees can be saved and planted in permanent sites where they will benefit the school or the community.

Naturally, the first location which suggests itself as a suitable planting site is the school ground itself. Many school sites are without trees of any sort. Others are filled with trees of undesirable species which can be replaced by better ones. Almost without exception school sites can be improved by judicious tree planting.

Before beginning to set out the trees a detailed planting plan should be prepared. This should show the locations of the buildings and features of the school ground which

will affect planting, and should show specifically where the trees are to be planted. This plan provides a definite scheme to be followed in the decoration and protection of the grounds and should be carefully worked out and as carefully observed. No specific directions for such a plan can be given here, but the following general rules should be observed:

(1) Sufficient space should be first of all set aside for a playground and no trees planted where they will interfere with this. A very desirable feature is to provide an open lawn directly in front of the building.

(2) Group the trees in masses as much as possible instead of scattering them singly. This will give a better effect in beautifying the grounds and afford better shelter.

(3) Avoid planting the trees in straight, formal rows. Plant in irregular groups, or along curved lines as much as possible. A shelter belt along the rear and possibly the sides of the grounds is desirable, especially along the north side, or the sides from which the most storms come.

### Distribution Among Pupils for Home Planting.

It is probable that if the trees grow well in the nursery and are of desirable species, there will be a demand for them on the part of the children or their parents for planting about their homes. As elsewhere suggested, especially desirable young trees of new or rare species may be awarded as prizes to those pupils who have shown the greatest interest in the nursery or have been most faithful in their work. The awarding of these prize trees might well form a very appropriate exercise for an Arbor Day program. When trees are to be taken to the homes of the pupils, special care must be taken to see that they are properly wrapped and packed, and the roots kept moist until transported to the final destination. Pupils should be instructed

## Fruit Fly Is Found In Coffee

A wireless from Honolulu last week, tells of the discovery of the fruit fly in a coffee berry in Makiiki. The discovery adds another phase to the task of destruction which has already been the source of much planning to the fly campaign committee.

### Some Descriptive Pointers

**Waimea—The Canyon**, wonderful scenic masterpiece, easily accessible on horseback.

**The Olokele Ditch**, great engineering feat amid cliffs and crags of exquisite beauty, accessible by carriage. **The Russian Fort**, on the bluff overlooking the harbor, an interesting relic. **The Hanapepe Falls**, "Manawaipuna," at the head of the Hanapepe canyon—carriages go half-way, thence by easy trail on horseback. **The Barking Sands** at Nohili, an interesting freak of nature, excellent roads for carriage.

**The Marine Drive**, Boating on the Wailua river.

**The Pole-line Trail**, most interesting ride or tramp into the tropical forests.

**Hanalei**,—The most wonderful coloring in the world. Hawaiian scenery includes all the colors of the rainbow, and the rainbow as well.

**Splendid sea bathing**. Driving and riding trips to **Lumahaui beach** surf. **Wainiha power house** and up the canyon. **THREELARGE HAENA** **HAENAPIAI**, a most satisfactory tramp.

### HOTELS

Simple accommodations, but good food is the rule in all country districts. Hotels are to be found at Lihue, Waimea, and Hanalei. Board may be obtained at almost any village on inquiry.

**Lihue**.—Hotel Fairview; W. H. Rice, Jr., prop. Rates, \$3.00 per day, or by agreement.

**Waimea**.—Bay View Hotel; C. W. Spitz, prop. Rates, \$2.50 per day.

**Hanalei**.—Deverill's Hotel, Mrs. S. B. Deverill, prop. Rooms for 15. Rates, \$3.00 per day, \$65.00 per month, or by agreement.

**Lihue**.—The Wailua Falls, upper and lower, both repay a visit. **Kilohana**, the extinct crater—splendid panorama of plains, mountains and sea.

ed to plant the trees as soon as they are unwrapped.

If there is any choice to be had as to the kind of soil, a loose, sandy loam should be chosen rather than clay. In the majority of instances, however, schools will have to be content to put whatever soil is available into as good condition as possible under the circumstances. It is well to have the seed bed in a place where it will not be exposed too directly to the sun. If possible, it should have a partial protection by being situated to the east or north of a group of trees or a building.

## San Domingo Scene Of Trouble

Owing to the disturbed condition of public affairs in San Domingo, following the assassination of the president, two U. S. Cruisers have been dispatched to the scene, for the purpose of protecting American interests.

## The Chinese Have Great Celebration

Last Tuesday night, the Chinese in Honolulu, celebrated with fireworks and speeches, the success of the revolutionary cause in their home country. The speakers included Hon. Frank Damon and other prominent men interested in China's future.

## Big Banana Plantations Go

Dr. Currie has decreed that all banana plantations in and about Honolulu, must go. Their actual annihilation will begin soon as estimates as to their value can be filed.
